### What's New In?

Grab screenshots with all web browsers and save them to any folder Automatic Website Screenshot Software comes loaded with a basic set of options that can be tinkered with. Simple setup and interface Automatic Website Screenshot Software creates an icon in the system tray to facilitate quick access to its options and gets minimized there. This way, it becomes non-intrusive and lets you carry on with your regular PC activity. It adopts a single window that shows all options available, giving you an overview before diving into the customization operation. Configure screenshot and general settings All you have to do is specify the capture frequency (in seconds) and the saving directory for the grabbed image files. They receive the JPG format and are named with the website title, along with the date and time of capture. In addition, you can view capture log details in the main window, open the destination folder without leaving the GUI, integrate Automatic Website Screenshot Software into the Windows autorun sequence to run by default every time you turn on your computer, as well as ask it to run minimized to the systray. Evaluation and conclusion It used low system resources in our tests and remained stable throughout its entire runtime. On the other hand, it's not explicit concerning the supported web browser. For example, it worked with Firefox and Internet Explorer in our case, but wasn't compatible with Chrome. On top of that, it wasn't accurate with the moment of capture (the images were taken earlier than we specified). Nevertheless, you can test Automatic Website Screenshot Software for yourself. Automatic Website Screenshot Software - is a program designed to take screenshots. Screenshots don't have a distinct meaning. They are simply elements taken from a web page by a program. Application helps to make screenshots of the whole or part of a web-site, and save it in a convenient folder. It has easy to use easy-to-adjust interface for the control of the application, and includes an integrated taskbar icon. Automatic Website Screenshot Software - program allows to easily preview the view of the captured web-sites. It is suitable for all versions of Internet Explorer, Opera, Firefox and Chrome. Automatic Website Screenshot Software can be downloaded for free from the publisher web-site. Key Features: Automatic Website Screenshot Software comes loaded with a basic set of options
