## MP3 Speed Changer License Key

New MP3 Speed Changer is a lightweight utility for quickly adjusting the speed of MP3 songs (in order to make them fit perfectly in ringtones, or in a mobile phone); you have complete control over the tempo and speak levels, in addition to other parameters. Mp3 Speed Changer works with MP3, WMA, WAV, OGG, FLAC, and APE files. After loading the files, you can change the speed of the audio, or adjust the playback to a custom bitrate. It can automatically adjust the duration of songs, according to their length, and add a sentry to each item, allowing you to keep the original names and filenames of the source files.

Features • Quick (real-time) speed adjustment of the audio tracks • High-quality playback • Fully automated MP3 Speed Changer • Supports all data formats (MP3, WMA, WAV, OGG, FLAC, APE) • Supports alternative stream languages (Spanish, French, English, Russian, Thai, Chinese) • Batch processing • Possibility to add additional metadata to the new files • Detects duplicate file names • Edit and preview of the MP3 files • Append tempo to the file names for easier identification • Supports file protection (PGP encryption) • Conversion of MP3 to MP3 • Allows overwriting of a file during the operation • Powerful encoding/decoding functionalities • Possibility to open any file • Minimal system resources required • Loads only the audio stream, leaving the files unchanged • Perfect audio quality (no artifacts) • Possibility to remove files from the list (by searching them first, or selecting them with the file browser) • Supports preview of songs in a built-in player

Support formats: MP3, WMA, OGG, FLAC, APE. License: Standard free license. There is no trial mode. Compatibility: 32-bit and 64-bit Windows XP, Windows

---

Vista, Windows 7, Windows 8, Windows 10, Windows Server 2003, Windows Server 2008, Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2. Platform: Windows XP 32/64-bit, Windows Vista 32/64-bit, Windows 7 32/64-bit, Windows 8 32/64-bit, Windows 10 32/64-bit, Windows Server 2003 32/64-

#### **What's New in the?**

- Enable changing MP3 files with one of the four variables: tempo, speed, amplification or speech level - Support (extensions) includes: .MP3, .MP3V2, .MP3X, .MP3S, .MP3M, .MP3O, .MP3E, .MP3W, .MP3N, .MP3, .WAV - Separate selection of each variable for the same MP3 file - Separate selection of each variable for the same folder - Supports the picking of the sound source of MP3 - "Add" "Delete" "Rename" and "Change" operations - Supports the sorting of the files in two columns - Adjustment through the sliders - Batch mode support - Clean and intuitive interface - Supports the preview (through the built-in audio player) - Supports the removal of files from the list and the modification of the preset patterns - Supports the modification of the output sound level and quality - Supports the modification of the output file name - Quick start guide - Free trial

**What's New in Version 1.07:** - Fixed: Rename file with the same extension as a source with the same name but different extension. - Fixed: Improve performing of the RENAME command during batch processing. - Fixed: Files with a zero length do not show a message informing of this when processed with the MOV operation. - Fixed: In rare cases, when processing of several files at once was not terminated properly, the progress dialog shows various errors. - Fixed: The text is not displayed correctly when the background of the

---

application is set. - Fixed: Speed parameter was not shown correctly during the process of the MP3 files with the parameter length. - Fixed: In rare cases (with the Kazaa audio) the process could not be completed properly. - Fixed: A short delay when processing the audio through the Kazaa audio. - Fixed: The information of the source file was not displayed at all in the case of a track with the name (copy of). - Fixed: The name of the WAV audio files was not shown at all. - Fixed: When the MP3 file with the name (copy of) was processed, the "Processing..." was displayed at the bottom. - Fixed: Possible format errors and the crash after processing the audio files were not displayed. - Fixed: The
