You may be think that the movie Singam 2 has has, maybe the people have Singam was unable to prevent. When a technology first takes hold, the focus often shifts away from being the most innovative and the most accessible, toward becoming the most known. That's what happened with smartphones. When Apple came onto the market with the iPhone 3G in 2009, they were its first to market and still are, but a few years later they are being eclipsed by the similar-yet-different Galaxy line of phones from Samsung. Now there are cameras too. While the first commercial digital cameras were indeed quite advanced and perhaps even groundbreaking, they quickly became known for their low price and high quality. The name associated with early consumer digital cameras was Kodak, and now there are cameras made by multiple manufacturers like Apple and Canon that are competing on price, features, and marketing techniques. These days, anyone can make a phone with just about any basic feature you'd like. Of course, just because you can doesn't mean you should. If you want to make that powerful phone to be truly powerful, it will cost you more. If you want an easy phone that is really powerful, it will cost you less. And to us, that's a
