I will share the link of the Windows 10 beta 7 here for

you to download. I just got the beta 7 today. It is a **WONDERFUL** beta 7. I think it is almost perfect beta 7, but the user interface is still not perfect. If you don't know how to save your web page history, you can reset it by following the way: Open the browser, go to the navigation pane, then click the hamburger icon and go to "tools" then "Settings". Go to "History", and click the "Restore to this device". To setup a new search engine, go to the browser, and click the menu option, choose add search
