We investigated the effects of T-220, a novel alpha 2-antagonist, on chlorpromazine (CPZ)-induced defecation and tremor in rats. CPZ (0.5-1 mg/kg, i.p.) induced defecation in a dose-dependent manner, whereas T-220 (1-10 mg/kg, i.p.) did not affect the frequency of defecation induced by CPZ. T-220 antagonized the hypermotility induced by CPZ in a dose-dependent manner. The inhibitory effect of T-220 on the hypermotility of CPZ was antagonized by idazoxan (0.25 mg/kg, i.p.), a selective alpha 2-adrenoceptor antagonist. On the other hand, T-220 did not affect the expression of CPZ-induced tremor in rats. These results suggest that T-220 may be a useful drug for the treatment of depression by antagonizing the hyperactivity of the central alpha 2-adrenoceptor.Q: Out of memory when reading from.txt file I'm trying to read in from a text file to find the word "X" and do something with it.
