Q: Is the dragon in Beauty and the Beast a gynoid? When the Snow White Queen created her seven (female) Dwarves, was she afraid the dwarves might be cyborgs? Or some part of

Where they come from is even more dubious. No one seems to know. Snow White was raised on a mountain, and the menagerie of animals in the forest are not of a strange, anthropomorphic origin. In the novelization, there is a very odd line in the prologue: Princess never knew how the

dwarves came to be. At some time in their history, a woman and a man were knocked to the ground by a great rock; beneath that rock there was a cave, and in that cave dwelt the dwarves, who had never before seen a face with skin that wasn't their own. She believed them to be descendants of the old-world wild-men who once lived deep in the forest. But, though she was a princess, none of the legends she had been taught had so much as hinted at such a thing as dwarves, let alone
