This is a post-apocalyptic tale set in the barren lands of northern Finland. Surviving the aftermath of the global catastrophe that occurred in December, 2038 has become more and more difficult for its one remaining inhabitant. It would be a daunting task for the young man to travel across the frozen wasteland of the Northern Hemisphere to search for the people he left behind. However, there is one more person waiting for him who wants to take him on one last adventure; The Moon. Best of the Year 7, 2015 Millennium 3 - The Eye of Arrion: A strange beast is stalking the clouds. A creature of legend that can be heard wailing in the night, that lurks in the shadows and that blocks the moonlight, has arrived. It attacks the inhabitants of Bloth City with unpredictable ferocity, yet has a mysterious way of connecting to the ones it seeks to devour. Best of the Year 5, 2014 Millennium 3 - The Boundless Boundary: The newly formed government of Bloth City, an almost completely cut-off urban sprawl in northern Finland, has finally declared Earth's first and perhaps last nuclear strike to be an act of war. Now, its inhabitants must survive a growing threat of rogue robot soldiers as well as monsters known only as the Dreadnoughts. Best of the Year 8, 2013 What's New in Millennium 2: 1)Gameplay: The Hammer action system has been completely overhauled and is now incredibly intuitive and customizable, allowing for countless new and varied game styles. 2)A New Narrative: Millennium 2 takes place after the events of Millennium 1 and before the events of Millennium 3. 3)New Locations: Deep below the rough wilderness of northern Finland lie several new environments both old and new - and you will get to visit them! 4)A New Troopers: A new group of enemies have appeared in the form of the Lunar Guards, an elite elite force that patrols the unexplored wilderness regions of the Moon. 5)Improved Multiplayer: Tackle new cooperative and single-player game modes with up to four players. 6)Free Features and Updates: As well as all of the above, our game development team is always busy working on new and improved features and improvements for the game. We are constantly looking for ways to make the experience even better for our players. 7)Procedurally Generated Game Content: This is the most

The DLC for Sakura Clicker - Hairstyle Pack includes the hairstyles for Sakura game characters and is not exclusive to this DLC. - a new Sakura-chan character with new hairstyles that changes the playability of the main character, but you'll need to unlock them first - new hairstyles for the main character, with two options for each - cosmetic rewards including new CG, a wallpaper and an icon Meeh, no new DLC content, but a new playable character! One of the main reasons why I had planned to do a Sakura Clicker game was because of the character! For this content, we made a new DLC with new hairstyles for Sakura. The content will contain the new playable character, but you'll need to unlock the hairstyles first. The hair is fully customizable, though it doesn't have the hair mesh available, meaning the amount of ways you can customize it is limited. But it's not a bad thing! The more ways you customize the hair, the more options you get to make unique poses with the hair! There's two options of hairstyles for Sakura. If you're a fan of manga-style hair, then you'll want to unlock the Maeko Hair. If you prefer pink, then you should go for the Machiko Hair. So what are you waiting for? Get to unlocking!..... Check out the Sakura Clicker - Hairstyle Pack page! Features: New Character - Sakura-chan - playable character, including new hairstyles that changes the playability of the main

What's new:

Bundled up for one low price, we've doubled the amount of content here for a limited time. If you're new to the series, follow our guide to Europa Universalis IV here. Includes all of the latest updates brought to the game in Europa Universalis IV - Digital Extreme Edition. This includes all DLC that is available individually, of course - we're not giving anything away simply by bundling it together. 1. New Playable Race The Eastern Empire are a young nation just beginning to make their mark.

With a strong core and expansion reserves, they dominate much of the continent across eastern Europe and south into central and southern Africa. 2. New Scenario The Eastern Empire sets a difficult bar to grasp for new nations. They are a strong empire that was forged and ruled by aristocracy, giving them a prestige rating of 9. Demographic pressure gives them some challenge: they suffer from a low fertility rate and there is a low growth rate. To boost this issue, they have a high elitism rate. They have also made a decision to be a monarchy with capital in Byzantium. 3. New Map As with the previous playspace: East Indiamap-, Europa Universalis IV: Digital Extreme Edition brings the world of Europa Universalis to a brand new scale and height. Whilst there have always been instances where Europae Universalis IV has allowed you to fight in the tundra region of Northern Europe, it has never been properly on the same map as the nations of Western Europe. This new map incorporates large portions of Central and South-eastern Asia and the Middle-East. 4. New Galley Discipline The exact composition of the Empire's fleet will vary on the whim of the ruling administration. For example, in some countries the carriage will be able to carry more people. Other nations, such as the British Isles, have only the bare-bones mess of an armed transport. More importantly, is the fact that the ship can be refitted at any port that offers a shipyard. 5. New Nation Management We have more of everything here from households to estates. Carefully crafted units, god-like leaders and dark mystery. Every city and town holds its own significance within the game. Units can be assigned to garrison their cities or patrol the surrounding area. Different kinds of buildings add variety to your ports, workshops and market places. Even
