Adobe has released many updates to the Photoshop program since its first release in 1992; see the website www.adobe.com/go/photoshop for updates. So why is this program so popular? It's powerful and easy to use — for most people, it is a one-stop program that enables you to quickly turn a bunch of basic photos into better ones. It also enables the creation of many web and print graphics. Photoshop is compatible with all major photo-editing software, including Elements, and it offers a unique feature that is indispensable for web graphics, the ability to create graphics in very small file sizes. Another big reason for the popularity of Photoshop is its affordability. Companies sell the software for \$300 for a single user and \$800 for a set of four. That's the equivalent of \$1300 for Photoshop Elements. You need to download Adobe Photoshop from the Adobe website (www.adobe.com/go/photoshop). You can also download Photoshop Elements from the Adobe website (www.adobe.com/go/elements). Looking at Photoshop Elements 8 Adobe Photoshop and Photoshop Elements are similar in many ways. However, Photoshop Elements 8 gives you the ability to create and edit some of the more advanced features without needing the version of Photoshop that costs \$1,000 or \$3,000. Here are some of the major differences between the two programs: Photoshop Elements includes all major Photoshop features, while Photoshop Elements 8 includes only the most essential features. The differences include working with layers, creating workflow presets, creating web graphics, drawing, working with color, enhancing photos, cropping, and making adjustments to details. You can save your work in Photoshop Elements 8. However, you can save your Photoshop file as a PDF document, which is a common way to print web graphics. To save your Photoshop file in PDF format, export the file to PDF format by saving it to PDF, and then save the file. In Photoshop, you can keep your files stored on a local hard drive or a drive connected to the computer. However, in Photoshop Elements 8 you can only keep files stored on the computer's hard drive. You can use the Elements features, like working with layers and creating workflow presets, without saving your work. However, if you save your work in Photoshop Elements 8, you can use layers in your work, like adding or deleting layers. A quick note about file sizes

Shmayer Shmayer (; also transliterated as Smayer) is a Bedouin Israeli Arab and Israeli settlement in the West Bank. Located in the Jordan Valley, it falls under the jurisdiction of Binyamin Regional Council. Shmayer is also a political club and sits within the larger Beit Ha'ir Regional Council. In it had a population of . The international community considers Israeli settlements in the West Bank illegal under international law, but the Israeli government disputes this. History The founders were members of the Hada'am Youth Movement. The first immigrants were young Bedouin who settled there in the 1970s. Some of them were former members of the Palmach, another association of Israeli Arab youths. They came from the areas of Ajloun, the Bir al-Saba and Beit Daras. They built the village's first houses with their own hands from bricks, stones and recycled material. At that time the original name of the settlement was Al-Sa'd, which means the village of the elders. They also taught the children, who lived in tents outside the settlement, about agriculture. In 1981, the Likud came into power and the settlement took the name of the Minister, Menachem Shmayer (Michael Shmayer). He and his son, Giora (a.k.a. Zaki Shmayer) came from the Negev, and settled in the village. One of his sons is one of the organizers of the Ovum (The Voice), a popular radio station. The village has been expanding since then. The Merhavia (The Water Company), an irrigation system built by the European Community, was opened in 1995. After the Second Intifada began, the village's residents were urged by the local authorities to move to the larger Beit Ha'ir Regional Council. But, the residents of Shmayer stood their ground, refusing to move to the large regional council. They remained in the village and started establishing new buildings. The Negev Regional Council also tried to cut off the electricity and water supplies in the village, but the residents bought these supplies and transferred them to Beit Ha'ir. The village's inhabitants received housing subsidies from the Ministry of Absorption. In 2008, the village was linked to the sewer system of Beit Ha'ir. The current mayor is Hezi Shapira of
