Mushijima Arachnid Bug More info: In Japan, Arachnid Bug, the makers of Mushijima, released a DSi game that. game to be a third game in the Mushijima series,.TORONTO -- Its ability to turn electronic devices into a wireless headset has made bone conduction audio processing an attractive option for both hearing aid users and the hearing impaired. Another application for bone conduction audio is the hands-free option for callers on mobile devices. Ray Dolby, a pioneer of bone conduction technology, has developed an in-ear solution that helps hearing aid users talk, listen and more. Dolby Labs unveiled its new hearing aid at the Fi-Con conference at the Sheraton Gateway Toronto Airport Hotel. "There are lots of ways hearing people can be helped when it comes to the audio experience," Dolby said. "That is what these hearing aids are about." The popular hearing aid market is largely dominated by products that amplify sounds in the ear canal. Dolby Labs is one of a few hearing aid makers that have been turning their attention to bone conduction technology. "What we are c6a93da74d
