One more thing: the Coca-Cola brand has been around for nearly 150 years. And the packages we shipped for millions of Americans over the years have also evolved. While we've added Coca-Cola Zero and a variety of fruit and vegetable-infused waters, the box remains pretty much the same. We know our consumers expect and deserve the same. The new Coca-Cola packaging will feature a premium top that is made from 18/8 stainless steel, which has been known to have a lifespan of at least 25 years, and has been used in some of the most iconic buildings around the globe. The shape of the new lid comes from a 19th-century patent granted to an engineer named Henry Perky in London in 1843. The fountain in its center was developed by a man named Samuel Taylor Coleridge in 1816. The company paid tribute to both as part of the design. In celebration of the new design for the lid, the company will release 4,000 limited edition collector cups in a series. Fans interested in purchasing a collectible can do so starting Jan. 19. The cups will be available in four locations: major cities in New York, Chicago, Los Angeles, and San Francisco. Each of the locations will receive a different package style for fans to choose from. NOTE: The files offered on this mod (and the other mods) are not a mod per se (they are just pre-made packs), you have to do some tweaking with your own file. It is recommended for players looking for a pack of texture overhauls. There are 5 mods in total, don't download more than one at the same time as one will conflict with the other.
